

## Midcourse Meeting – SSY145 Wireless Networks

### Participants

Tommy Svensson (examiner) [tommy.svensson@chalmers.se](mailto:tommy.svensson@chalmers.se)

Ander Lee (EXCH) [leea@student.chalmers.se](mailto:leea@student.chalmers.se)

Emma Rådahl (MPCOM) [radahl@student.chalmers.se](mailto:radahl@student.chalmers.se)

### Midcourse meeting minutes

- The lectures seems to be appreciated and are going well, despite being online. The participation level at the online lectures is high, above 90%.
- Some students are expressing that it is a bit harder to keep the motivation for the studies without the social interactions at the campus. We discussed if there would be something we could do around the course to compensate for that. One possibility would be to encourage some mingling discussions a few minutes before the lecture starts using video mode in Zoom. Tommy will encourage this during the 15 minutes before the lecture starts.
- To help understanding the lectures of the various guest lectures, Tommy will look into a way to summarize the previous lecture briefly just before the start of the next.
- To help glueing the groups better together now when there are no opportunities to meet unplanned at the campus:
  - Tommy will highlight that peer-to-peer private messages are possible in Zoom, which could allow groups to chat in conjunction to the lectures.
  - Tommy will schedule an optional projects consultation meeting in Zoom on Friday May 24 at 16-17 with break-out sessions per group, as it was done on Mon March 30.
- Feedback on the project planning reports got a bit delayed due to high workload for Tommy, but has now been communicated during this week (all were approved).
- We will encourage all in the class to take the survey at the end of the course, to avoid the low participation level last year. Potentially some incentives could be created, like extra points, if allowed at Chalmers (we are aware that some teachers do that in other courses).
